

Thomas J. Costello, P. E.

Vice President/Operations

As Vice President of Operations for the Downes Construction Company, Tom is responsible for all construction-related operations. His responsibilities include direct supervision and support of planners, estimators, project managers and superintendents as well as technical support with respect to construction methods, materials selections, quality control, project scheduling and safety coordination. During pre-construction and construction Tom participates significantly with emphasis on planning, scheduling and coordination of construction activities.

Tom has been with Downes Construction Company for over 35 years. He has served as an Estimator, Chief Estimator, Project Superintendent, Project Manager and General Superintendent. Individual project experience includes multi-million dollar commercial and industrial development, hospital and health care facilities, schools, major demolition and renovation projects.
